## DRIVE IN TO “BUGS IN THE HANGAR” SEPT 11

Let's make out at the “Bugs in the Hangar” hosted by Timeless Wings N' Wheels at New Smyrna Beach Airport. It's our regular meeting day and we'll set up the CFVWC popup on the grounds of the airport. Enjoy the vintage airplane (and missile!) restoration work ongoing. Those who wish to will enjoy lunch at the nearby “Athens” Greek restaurant. If that weren't enough, some members have expressed interest in coming done to the Van Treuren dome house for a brief rest, then heading up for the New Smyrna “cruise” car display later that afternoon. Details inside in Secretary's Report. (Also inside, why there is all this drive-in talk!)

The kindred folks who had joined us for our convention show, SEVWC, are planning on being at the hangar as well. Two weeks later they are hosting the 4th Annual Cruising For A Cause VW Run. That is Sept. 25th, 2010, 9-3pm, at the Daytona Beach Flea Mkt. (For info go to [www.sevwcgreaterdaytonabeachchapter.com](http://www.sevwcgreaterdaytonabeachchapter.com))

## Volkswagen sets up drive-in movie theater in Wolfsburg

It that looks rather modest, that's because it's not the drive-in movie. From the 19 to 21 August on the Festplatz in the Allerpark, Wolfsburg, a Volkswagen 'Autokino' – drive-in cinema – was installed. A massive 300 square metre screen – one of the largest in Europe - will show three blockbuster movies over the three evenings: Iron Man II, S\*x and the City II, and on Saturday night, Shrek IV. Entry price is 7 euros per person and there is capacity for around 350 cars. The event has been organised by Cinemax in Wolfsburg and Volkswagen AG.

Part of the 'The Major and the Beetle' exhibition is a video display and a unique 'Beetle sofa'(above). Created from half a Beetle, it incorporates a seat and built-in audio facility so visitors can sit in a piece of history and learn about it simultaneously.

The official unveiling of the exhibition and new permanent exhibit, is celebrated with a historic Volkswagen car show and a 'meet up' for Volkswagen enthusiasts, all dedicated to the memory of Major Ivan Hirst, REME. The Corps of Royal Electrical and Mechanical Engineers (REME) and Volkswagen have a long history together from the end of the Second World War when the intervention of a young British Army officer changed the future of the fledgling giant of European motoring.

Sent by the Control Commission to 'sit on' the bombed remains of the Volkswagen factory in Wolfsburg in August 1945, the 29 year old Major Ivan Hirst REME and his team decided to restart production instead. Major Hirst then secured an order for 20,000 Beetles from the Military Government; meeting this order would take all the management and engineering skill he had. Post-war Wolfsburg suffered shortages of food, skilled workers, housing and work materials. Major Ivan Hirst's engineering and management skills together with his people skills, his open door policy and his will to succeed, turned the Volkswagen Factory around and ensured its survival.

Judy Booth, Senior Curator at the REME Museum of Technology said: 'Without Major Ivan Hirst REME, there may have been no Volkswagen as we know it today. Ivan Hirst was a hero in his own quiet unassuming way; a man who not only saved a fledgling car company but a man who's humanity found a path through the problems left behind by the war. This exhibition recognizes him and his work.'
